

iControl Solo

Standalone PC-based Control

Space-saving, modular platform for advanced signal processing.

iControl Solo from Grass Valley, a Belden Brand, is a standalone, PC-based control application for configuration and management of Densité modular products.

It provides the ability to group, label, manage, configure and control upwards up 100 Densité Series modules, using a simple and convenient user interface with tree-based hierarchical representations of the miscellaneous elements. Operators and engineers gain quick access to devices and parameters for easy control of the most advanced functions.

iControl Solo can also collect audio loudness measurements from various Grass Valley devices, enabling the companion Loudness Analyzer application to plot and review measured levels and other key audio parameters.

iControl Solo Standalone PC-based Control

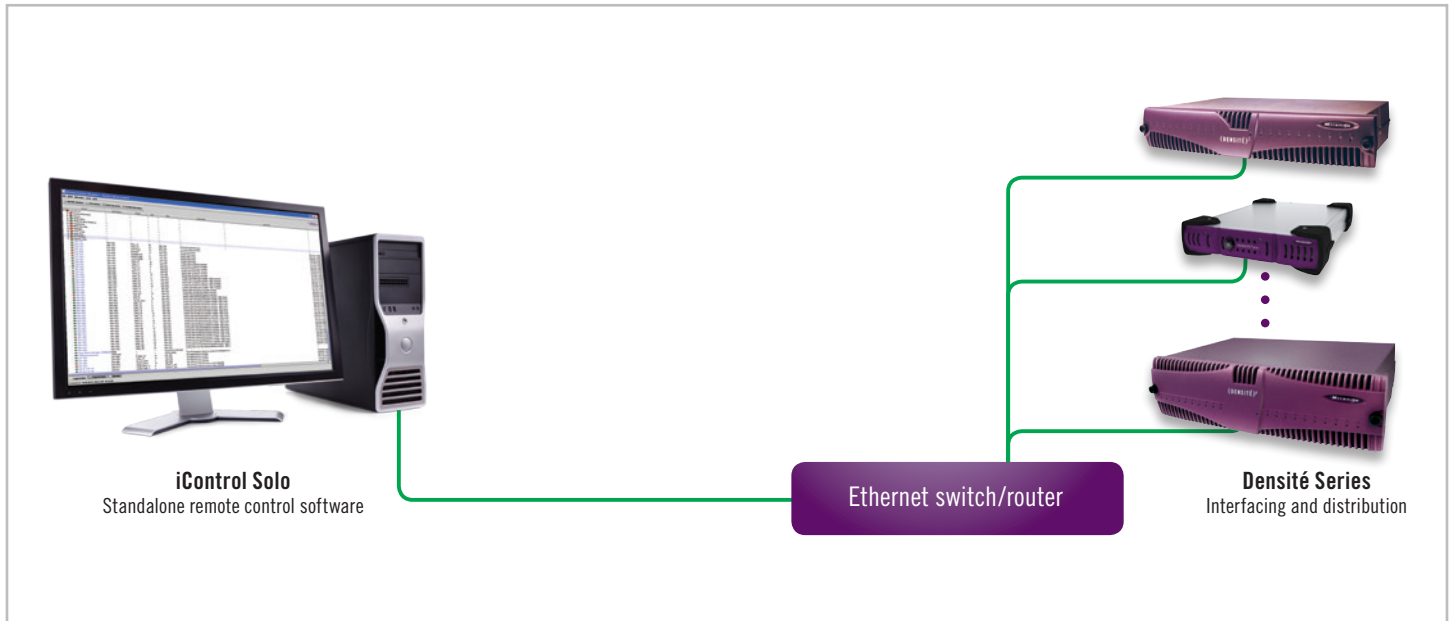

KEY FEATURES

Standalone software

- PC-based control GUI
- Fast and easy control
- Can configure and control up to 100 Densité modules, and does not require an iControl Application Server
